WORKING EXPERIENCE

PT Amerta Indah Otsuka, Sukabumi

Jan 2025 – Jan 2026

Full Stack Developer

- Developed **DPIA App**, a centralized digital system ensuring compliance with Indonesia's PDP Law, facilitating data protection assessments, and maintaining audit trails using Angular, Bootstrap, and Express with Prisma.
- Developed and maintained **AI Management**, an internal app for managing AI knowledge, documents, and user access roles using Angular, Bootstrap, and Express with Prisma.
- Developed **Sisuka AI**, an interactive public chatbot powered by OpenAI + Dify to answer company-related FAQs. Included features like speech-to-text, suggested replies, auto follow-up, and user satisfaction feedback. Built using Next, Tailwind, and Express + Prisma.
- Developed **Canteen App**, an integrated application for managing employee meal planning and actual meal data, with RFID-based validation and checklist by canteen staff, using Angular, Bootstrap, and Express with Prisma.
- Upgraded the **RISE** application by integrating a BI Checking workflow for administrators to streamline candidate screening, and developed a responsive Dark Mode for the microsite interface.
- Collaborated with a cross-functional team using Git, GitLab, and Notion for version control and task management.

PT Sukaharja Quail Indonesia, Bogor

Jul 2024 – Dec 2024

Full Stack Developer

- Developed user interfaces using React JS and Tailwind CSS, creating reusable and responsive components based on design specifications.
- Implemented responsive design for various devices and ensured consistent layout using Tailwind CSS.
- Developed and implemented interactive features such as dropdown menus, tabs, and modals to enhance user engagement.
- Designed and implemented APIs for CRUD (Create, Read, Update, Delete) operations using Express JS and Sequelize-CLI, and seamlessly integrated them with the frontend for data fetching and interaction.
- Created form validations and dynamic input components using React.
- Utilized Git and GitHub for version control and project collaboration.

Badan Standardisasi Nasional, Jakarta

Feb 2024 – Jun 2024

Full Stack Developer

- Implemented user interface designs using HTML, CSS, and JavaScript.
- Collaborated with the UI/UX Design team to build responsive and mobile-friendly interfaces using Bootstrap CSS.
- Integrated APIs into the frontend to display dynamic data seamlessly within the application.
- Developed CRUD (Create, Read, Update, Delete) features using Laravel and MySQL.
- Managed version control with Git and collaborated with the development team through GitHub for streamlined project workflows.

EDUCATION

IPB University, Bogor

Aug 2021 – Aug 2025

Bachelor of Applied Science, Software Engineering Technology

GPA 3.79 of 4.00

PROJECTS

Project Management System, Bogor

Jan 2026

Full Stack Developer

- Developed a high-performance project management application using **Golang** and **Fiber** to ensure fast and scalable backend processing.
- Built a dynamic and responsive user interface using **React.js** and managed complex data relations with **PostgreSQL**.
- Implemented core features including task management, real-time project status tracking, and team collaboration tools.
- Designed and structured a clean RESTful API architecture for seamless data integration between the frontend and backend.

Streamy, Bogor

Sep 2024

Full Stack Developer

- Developed user interfaces using React JS and Tailwind CSS, creating reusable components.
- Integrate project with payment gateway from Midtrans Snap.
- Implemented an authentication system using Laravel Breeze for user registration, login, and logout.
- Developed CRUD (Create, Read, Update, Delete) and restore features using Laravel Inertia React for movie data management.
- Implement form validation in frontend and backend.

TalasGo, Bogor

Nov 2023

Full Stack Developer

- Implemented a responsive user interface using HTML, CSS, Bootstrap, and JavaScript.
- Collaborate in the design of software systems, including the development of Use Case Diagrams, Activity Diagrams, Data Flow Diagrams (DFD), Entity Relationship Diagrams (ERD), and Class Diagrams.
- Developed CRUD (Create, Read, Update, Delete) features using PHP Native and MySQL to manage product and article data.
- Implemented search, pagination, and detailed view features for product and article data.
